PROJECTS

MARVEL FAN PORTAL

- Built an interactive Marvel-themed website using **HTML, CSS, JavaScript and Bootstrap**
- Added **animations, hover/click effects**, character detail modals, and **mini fan-input forms**.
- Focused on **UI/UX with responsive design** inspired by Marvel aesthetics.
- **Currently implementing:**
- React + Tailwind migration for component-based, scalable UI.
- Database integration to store and display user reviews for their favorite superheroes.

LANGUAGE DETECTOR

- Built a **language detection model** capable of identifying text in **22 different languages** (1000 words each).
- Implemented **Bag of Words (BoW) feature extraction** for text preprocessing and vectorization.
- Utilized **train-test split** for model evaluation, achieving reliable performance.
- Designed as an **introductory AI/ML project**, showcasing fundamentals of **NLP and classification models**.

SAFECROWD AI Ongoing

- Building SafeCrowd AI, a multimodal crowd-safety system using **YOLO, OpenCV, Whisper, and GPT-4** for real-time video/audio analysis and risk detection.
- Developing a full-stack architecture with **React.js, FastAPI, PostgreSQL, and Docker** to deliver live monitoring and AI-generated safety alerts.
- Selected for the **State-Level OpenAI x NxtWave Buildathon 2025** among 25,000+ participants for an impactful AI-for-Societal-Good solution.
- Implementing **predictive analytics** providing **10-minute early warnings**, improving crowd-risk detection accuracy and reducing potential casualties.
